

Dear Yves and others,

Thanks so much for escorting Yarka around Budejovice, to hospital & cemetery, etc. We have been going over what she found, and she has shown me many pictures. She also gave me the model of the Jeep you sent along. I thank you very much for all. Incidentally, when I was in the US Marine Corps, 1946-48, one of my jobs was to patrol the perimeter of the Naval Ammunition Depot in a Jeep. Unfortunately for me, I turned one over going around a corner too fast and had to pay for the damages. Neither of us were hurt. We just turned the Jeep back over onto it's wheels and drove back to HQ.

Later when I was serving in the US Air Force during the Korean War, I had a chauffeur.. Note photo!! I was the C-119 squadron Engineering Officer in Ashiya, Japan.

Happy New Year,

Keeping the memory alive!

Napsal nám Joe Noah z USA a píše:děkuji mnohokráte za doprovod Jarky po okolí Budějovic a za model Jeepu .který jste mi poslali. Mimochodem,když jsem sloužil v US Marine Corps 1946-48 jedna z mých prací byla ostraha lodních skladišť a jezdil jsem v jeepu.Jednou jsem jel moc rychle ,otočil jsem se dokola a jeep se převrátil .Hodili jsme ho zpět na kola,nikomu se nic nestalo a pokračovali jsme zpět na základnu.Ale chtěli po mě náhradu škody.Později,když jsem sloužil v US Air Force v Korejské válce(v C 119 squadron Engineering Officer in Ashiya ,Japan odtud foto) jserm měl již šoféra. Šťastný Nový rok
